DeepCool AG400 BK ARGB UNI CPU kuler 220W
120mm 2000rpm 75CFM
LGA1700/1200/1151/1150/1155/AM5/AM4

Šifra: 71054

Kategorija proizvoda: Kuleri

Proizvođač: DEEPCOOL

Cena: 4.894 rsd.

AG400 BK ARGB

The DeepCool AG400 BK ARGB is a single tower 120mm CPU cooler that builds upon our legacy for high-quality cooling performance but stripped down for a streamlined and efficient package.

GAMMAXX SERIES

AG400 BK ARGB

Efficient 4 Heat Pipes CPU Cooler

The DeepCool AG400 BK ARGB is a single tower 120mm CPU cooler that builds upon our legacy for high-quality cooling performance but stripped down for a streamlined and efficient package.

Stellar Thermal Performance

Enjoy better system performance by keeping things cool with up to 220W of heat dissipation power featuring four direct touch heat pipes that rapidly draw heat away from the CPU.

FAN LOCK MOUNTING SYSTEM

When installing the AG400 BK ARGB, the fan does not need to be disassembled during the process, simplifying and saving time.

Balanced Bidirectional

Heat Pipe Technology

By optimizing the internal capillary structure and injecting a precise amount of liquid, the heat pipe achieves the best heat dissipation performance regardless of whether the cooler is in a vertical or horizontal case. This perfect ratio facilitates a highly efficient phase change throughout the heat pipe and achieves lower thermal resistance over a wide TDP range.

High Efficiency Fans

Find your optimal balance with automatic PWM support for full performance under load to silent efficiency at idle.

500-2000 RPM

31.6 dB(A)

75.89 CFM

Matrix Fins Array

High-quality aluminum fins on the heat sink are densely stacked for ideal heat dissipation and which also features a unique "checkerboard" design aesthetic.

Simple and Secure

The included mounting brackets support both Intel and AMD platforms with an easy five-step installation
