Cena: 3.771 rsd.

LOW-PROFILE KEYBOARD The set is powered by a high-quality membrane keyboard with a low profile, which will satisfy even the most demanding players with its functionality. The palm rest and folding legs ensure comfort of use, while the multi-color backlight function will please the eye during gruelling competitions. In addition, the keyboard offers 12 multimedia keys and anti-ghosting for 19 keys. What's more, the water-resistant design will guarantee safety during unwanted flooding, keeping you under control even when the situation gets out of control. **PROGRAMMABLE MOUSE** The ability to customize multiple mouse functions to suit your needs is a very important feature for many gamers. Therefore, the composition of the Thunderstreak 3.0 set has been enriched with a rodent with unique software that gives the ability to edit macros and assign a wide range of functions to each of the five programmable buttons. In addition, a precise optical sensor with a maximum resolution of 4000 DPI will provide a huge number of possibilities in any phase of the game. You will take care of the phenomenal visual effect thanks to the LED backlight, which will give your stand an original character. **NEW STEREO SOUND** The combination of the highest quality stereo sound with a sensitive microphone mounted on a flexible arm will guarantee excellent communication with partners and high-quality audio transmission. Thanks to this, you will perfectly find yourself on the virtual battlefield. The dynamics of the drivers remains at the level of 105dB, the frequency response in the range of 20 - 20,000 Hz, and the impedance of the speakers is 32 Ohm. Comfort at the highest level will be provided by soft earmuffs trimmed with fabric, which improve air circulation and reduce overheating of the ears, which has a direct impact on the comfort of use. **DURABLE PAD** Compact pad made of the highest quality materials will ensure you comfortable playing regardless of the conditions. The top layer finished with fabric will guarantee precise movement of the sensor, so that you can demonstrate incredible accuracy even in the most demanding moments. The non-slip rubber base ensures that the pad stays in place and does not move at an unexpected moment. What's more, the unconventional design will complement any gaming station in an effective way.
